Subject: Settlement Furthers a Monopoly

This settlement, from what I can gather from news sources, serves to further entrench Microsoft in our lives. Any company would love to have similar access to teachers and students. It is tantamount to a marketing campaign for them. How shameful that the government trying to prevent a monopoly is helping to bring even more people into it's grasp. This cannot be allowed to happen. Any settlement must be painful to Microsoft, financially, and must include limits on the development, bundling, distribution and marketing of their software. Please don't let this settlement take place. Best wishes.
